

THE KELOWNA COURIER

AND OKANAGAN ORCHARDIST

VOLUME 5

KELOWNA, B.C., THURSDAY, AUGUST 27, 1908

NUMBER 4

City Property For Sale on Very Easy Terms

One ten-acre lot in high state of cultivation with 750 trees that will bear fruit next year.

One new brick cottage with nine good rooms and good cellar, with one-half acre of ground; corner lot; about 300 feet street frontage.

One new brick house with nine good rooms and good cellar with lot to suit purchaser; can be made corner lot if desired; over 200 feet street frontage; all planted out to choice fruit.

A number of building lots in the choicest location where you can have a cellar under your house; with or without bearing trees; in sod or under cultivation; in lots of twenty-five feet up; facing North, South, East or West. These lots are the highest and best drained within the city. Call and see them before you buy elsewhere.

F. R. E. DeHART

WE ARE OFFERING for a few weeks only a number of lines at greatly reduced prices. Among these are:

Quarter Oak Dressers and Wash Stands

Reduced from \$35.00 to \$28.00 cash

Felt Mattresses

Reduced from \$13.50 to \$9.00 cash

Other Lines in Proportion

KELOWNA FURNITURE CO.

THE BIG STORE

We make special suits to measure. Fit and finish guaranteed. No extra charge.

New Fall Suits

We have just placed in stock our first delivery of the new fall suits. The patterns are the nobbiest which have been shown for years. Notable are the pencil stripes.

20th Century Brand fine garments for men are the accepted models all over Canada. They are closely watched and often copied by the best custom tailors.

There must be a reason. Call and see.

Lequime Bros. & Company.

We are showing a big range of samples for fall overcoats: Tweeds, Beavers, Meltons and Friezes.

ERRORS IN SPRAYING

Some Common Fallacies

(Nelson News)

Address by Prof. H. A. Surface, Harrisburg, Pennsylvania, at the meeting of the Ontario Fruit Growers' Association.

A number of erroneous impressions are common in regard to spraying. There is a general impression that spraying is a preventive of all loss in fruit growing. Nothing can be more fallacious; it is not. I will try to bring out more clearly what I mean. First, there is a general feeling that it is necessary to spray to prevent the appearance of insects. I know of only one insect for which we spray to prevent its coming; that is the codling moth. We do not spray to prevent the coming of insects although we do spray when they are present to destroy them and prevent loss by their attacks. If I had an orchard free from insects, I should not spray with anything so far as insects are concerned, accepting that I would spray at the proper time and with the proper material for the codling moth.

There is a very general impression that Bordeaux mixture is an insecticide; it is not. At the same time it may act as a repellent and drive away certain insects. It is simply a fungicide composed of copper sulphate and lime and if you wish to make an insecticide of it you must add an arsenical poison.

There is also an impression that Bordeaux mixture will cure plant diseases. There is a difference between curing and prevention. Prevention is better than remedy. It will not cure fungus diseases, but will help to prevent their appearance. There is a great difference between spraying with insecticides and with fungicides. The difference is this: With insecticides, in all cases save that of the codling moth, spray as a remedy; with fungicides, we spray to prevent the appearance of disease, such as scab, leaf spot, rot, mildew, peach leaf curl, etc. After such a disease as leaf spot or fungus has started in leaf it cannot be cured in that leaf.

Again there is an impression that benefit can come from spraying trees in bloom. We do not spray blossoms as no benefit of any kind is to be had from doing so. It is bad horticultural practice. If there be a surplus of blossoms and you wish to reduce them, it will help to thin the crop, but it is a poor way of thinning, and not to be recommended. I have seen abortive fruit produced in this way, and, besides, there is the danger of killing bees, which do so much to fertilize and cross-fertilize the blossoms.

There used to be an idea that spraying would poison fruit or vegetables. This especially was thought to be the case in spraying cabbage for the cabbage worm. Our best gardeners spray cabbage with Paris green, and analyses show that a person would have to eat about two hundred cabbage heads to get enough Paris green to affect him. Spraying does not poison fruit and there is no danger of it doing so. Another mistake is the thought that animals are liable to be poisoned by eat-

ing grass under trees sprayed with Paris green or arsenate of lead. There is almost no danger in this respect. Of course there should be no grass in the orchard unless the "sod-mulch" system is being practiced, a method that is well worth trying.

There is an idea that spraying kills bees. With lime-sulphur wash that is absolutely wrong as the wash is applied before the buds burst. With other insecticides there is no danger so long as they are not applied while the blossoms are open.

A writer for Prof. L. H. Bailey recently wrote an otherwise excellent article for his Cyclopaedia of Agriculture on birds in relation to agriculture, in which he made the remarkable statement that birds are liable to be killed by modern methods of spraying. I consider this entirely false. Spraying does not kill birds, and I wrote the editor saying that if the statement were published I should protest against it, and that others would protest against it, too. I am glad to learn that it was stricken out.

Many people think that if a little is good, more is better. That is a very poor belief. There is more danger from too much than there is from too little. Too much may endanger or kill the plant. Too diluted a formula may result in not accomplishing the work for which you are spraying—in not preventing the disease or killing the insect—but you will have no other loss than that of time and material and possibly continued pests; whereas, if you use too much, you are liable to injure the fruit or even kill the tree. There are certain materials of which it makes little difference if you use too much, such as the lime sulphur mixture and the Bordeaux mixture applied when not in leaf.

The question has been raised as to whether aphids could be killed by the lime-sulphur wash. I know it can be done; as I have seen the boiled lime-sulphur wash clean up both the apple aphids and the cherry aphids, applied just before and when the buds were bursting.

It is the general opinion of operators that materials can be mixed by guess. They should be weighed and measured most carefully, to the very ounce. When I tell a man to spray eight per cent kerosene, I do not mean ten per cent, and if he should use four per cent or five per cent above what I say he is to use, it is liable to result in injury to his trees, under certain conditions. A man should know the exact percentage to use, as well as the correct time to apply it.

There is a general impression that spraying can be done when the wind is blowing and get satisfactory results. It is almost impossible to spray against a wind. You should spray with the wind and cover that side of the tree; then you must wait till the wind has ceased or changed direction before spraying the other side. That is the only proper way to spray if windy. You cannot throw a spray against the wind, although you might use a squirt gun or a fire hose and throw a stream or jet, but that is not spraying. The spraying material, in a fine state of division, should drift over the tree in the

Mothers! Attention!

The holidays are now over and with the commencement of school comes the shoe question.

Our immense trade in the past has assured us that the people of Kelowna have appreciated our endeavours to give them THE RIGHT KIND OF FOOTWEAR AT RIGHT PRICES, good, serviceable footwear, the kinds that look well and wear well, all solid leather through and through.

W. B. M. CALDER, Prop.

form of a mist, and not be thrown as a stream, and sometimes not under too great pressure. I have known of cases where so much pressure was used with Bordeaux mixture that the material was actually driven into the pores of the leaves, which were severely injured in consequence. There is a possibility of injury by using too much power when the leaves are in a delicate or tender condition.

Q.—Would 35 pounds pressure be about right?

A.—Yes; and then you will not have this difficulty. Many people using power outfits spray at from 60 to 80 or more pounds pressure, and rarely get below 40 pounds. High pressure will not cause any injury when trees are dormant.

Many suppose that the height to which the spray is thrown depends upon the power of the apparatus. That is not so. What is required more than anything else for very high trees is sufficient length of hose and an extension rod, with ladders for operators to climb.

Efficient spraying cannot be done with poor, cheap hand apparatus. For the average orchard I would not recommend anything cheaper than a good barrel sprayer.

Many men seem to think that one spraying should be enough. Some write me: "I sprayed my trees once, and the scale is there still; I am disgusted with the formula you recommend." It takes more than one dose of medicine to cure a disease, and more than one spraying to overcome scale.

If we can control the San Jose scale and produce first fruits without much expense, that ought to be sufficient to satisfy us for the present; we can never get rid of it entirely. Do not think you can spray two or three infested trees in an orchard and leave the rest. Under such conditions all the trees should be sprayed, being sure of the

Contract Advertisements—Rates arranged according to space taken.

Contract advertisers will please notice that all changes of advertisements must be handed to the printer by Monday evening to ensure publication in the current issue.

THURSDAY, AUGUST 27, 1908

KELOWNA RIFLE ASSOCIATION

Weekly Scores

Last Thursday's practice brought out a very fair attendance of members, a dozen taking part in the firing. There was little wind, but the smoky haze from distant forest fires made the target dim at the longer ranges, and the less experienced shots fell down at the 600. The marking was also not entirely satisfactory and Mr. T. Allen had a splendid score spoiled by a mark that was palpably wrong. He began with an inner for a sighting shot at the 600 and put on three bulls-eyes in succession. His fourth shot, which seemed to strike in exactly the same place as the others, was given against him as a miss, but undaunted he put on three more bulls, and there is little doubt but what his true score was a possible, a notable achievement in view of the poor light. Mr. A. Eutin put on a good 31 at the 500, scoring four bulls in succession.

For the first time, the handicap was added to each man's score, and the aggregate each week counts for prizes to be awarded at the end of the season. The Association is carrying out improvements on the mechanism for raising and lowering the targets, which will greatly accelerate the speed of marking and firing, and will enable the practices to be continued up to winter in spite of the shortening days. CITY COUNCIL

The Council met on Saturday with the Mayor and Alds. Buckland, Curtis and DeHart in attendance.

The following accounts were referred to the Finance Committee and ordered to be paid, if found correct: Newby & Co., sidewalk on

Glenn Ave. \$100.00

Kelowna Regatta Committee, grant 75.00

W. C. Blackwood, filling in slough on Bay Ave. ... 50.00

H. T. Mengoni, special constable's fees 6.00

W. A. Dimmock, special constable's fees 6.00

D. Orr, special constable's fees 6.00

J. B. Biggs 9.00

It was agreed to pay Mr. H. W. Raymer the sum of \$2,250, being his contract price for building bridges across Mill Creek on Abbott, Pendozi and Richter Sts.

On the motion of Alds. DeHart and Buckland, the tender of the Hinton Electric Co. for installing and wiring the pole line was accepted with a few amendments to the contract.

The City Engineer was authorized to countersign orders for electric light and water supplies.

The report on local improvements on Richter St., from Sutherland Ave. to Cadder Ave., was accepted.

On the motion of Alds. Curtis and DeHart, it was agreed to buy a Board of Underwriters' pump from the Canadian Fairbanks Co. at the offered price of \$1,750, installed.

The Council decided to call for tenders for the painting of the new bridges across Mill Creek.

The Clerk was instructed to write to the Deputy Commissioner of Lands & Works to the effect that the Council was opposed to the grant of Mr. Rembler Paul's application for foreshore rights.

Another meeting was held on Tuesday, with the Mayor and Alds. Gaddes, Curtis and DeHart present.

The following accounts were referred to the Finance Committee and ordered to be paid, if found correct:

J. Kincaid, work on side-walks 37.08

W. Wilson, work on side-walks 53.04

J. Marty, work on side-walks 40.46

H. Ingall, building stand for water cart 2.70

McKay & Hamford, poles and piles 464.40

W. Dalgleish, work on streets 190.00

W. Glenn, gravel and filling on streets 41.50

W. Glenn, gravel and filling on streets 1152.30

Can. Gen. Elect. Co., wire for lighting system ... 1086.25

J. L. Doyle, assessing for local improvements ... 7.50

Can. Pac. Ry., freight on wire 5.01

On the motion of Alds. Gaddes and Curtis, it was agreed to pay \$264.40 to Messrs. McKay & Hamford on account.

The account of A. W. Dalgleish for grading Gertrude Ave. was passed.

By-laws 45 and 46 were read a first time.

It was decided to pay 25 per cent to Chief Hidson on his collections of road and dog taxes.

Casorso--Depowell

A pretty marriage ceremony was performed in the Catholic Church at the Mission on Tuesday morning, when Rev. Father Garon united in the bonds of wedlock Mr. Louis Casorso to Miss Kathleen Depowell. The church was beautifully decorated for the occasion, and was well filled by a large attendance of the friends of the young pair. Mr. Joseph Casorso was best man, and the bride was attended by Miss Maria Lefevre. The happy couple left the church amidst showers of rice and dove to Mr. J. Le Franco's residence in Kelowna, where lunch was served to about fifteen couples at tables gorgeously decked with flowers.

The rejoicings wound up with a dinner and dance at the home of the bridegroom's parents. The tables were again beautifully decorated with cut flowers, tastefully arranged by Mr. Alcock.

The honeymoon will be spent at the Coast, and on their return Mr. and Mrs. L. Casorso will take up their residence on the Casorso property. Mr. Louis Casorso wishes to thank all his friends for their kindness and their many handsome presents.

MOUNT VIEW METHODIST

Church Social

(Contributed).

A combined Sunday School picnic and church lawn social in connection with Mount View Methodist Church was held on Thursday afternoon and evening last, on the grounds of Mr. W. H. Fleming, Vernon Road.

The races and games indulged in by the children formed an interesting feature of the afternoon's programme. The game of baseball played on the adjoining grounds between Black Mountain and Bennoulin teams was attended with great excitement, especially during the last two innings. The result was in favour of Black Mountain.

A number of beautiful selections of vocal and instrumental music was rendered upon the phonograph by Mr. J. Woolley.

The proceeds from the excellent supper served by the ladies and from the booth were very satisfactory.

Manhattan Beach Notes

The season is drawing to a close for camping on Manhattan Beach, and the "sand rats" are scampering to their more cosy nests in town.

Mrs. George Meikle entertained the ladies of Manhattan Beach at a birthday party last Saturday afternoon. The event was novel in that there was an entire absence of the formality customary on such occasions, and everybody acted naturally and adapted themselves to the conditions of camp life. Several ladies from town also were present. Delicious refreshments were served.

FARM AND GARDEN

Wintering Pansy Plants

Pansy plants will live all the winter when the seeds are sown in August, and the object is to carry them over the winter to flower early the next season. Plants that have already been through a winter cannot be expected to endure a second winter under ordinary conditions, and if it is desired to carry a stock over for a second year, the most reasonable plan would be to take cuttings in the late summer and carry them over winter in a cold-frame. In very cold climates it might be necessary to protect the plants, whether cuttings or seedlings, by a light mulch of salt hay, straw or leaves.

Plucking by Machinery

Chickens are now plucked in a wholesale manner by the use of pneumatic machinery. There is a receptacle in which the fowl is placed after being killed and into this are turned several cross currents of air from electrical fans revolving at the rate of 5,000 turns per minute. In a few seconds the bird is stripped of its feathers, even to the tiniest particles of down, and the machine is ready for another.

ERRORS IN SPRAYING (Continued from page 1)

second or retouching spraying.

Some think they can modify the formula recommended and get better results. It is not safe to attempt it.

The following facts are not generally known:

That sprayed fruit stays on the trees much longer than when unsprayed.

That some diseases are not to be prevented by spraying, namely, apple and pear blight and peach yellows.

The operation should be for a definite object; we should know for what we are spraying, and then spray thoroughly at the right time with the right material, in the right proportions, with proper apparatus. This is a very important thing. Spraying is not in itself sufficient to produce good fruit; we must have cultivation, pruning and thinning of fruit, and finally we must spray as the most satisfactory means of controlling insect pests and preventing plant diseases.

Q.—Do we understand you to say that spraying will not prevent leaf curl?

A.—It will prevent it, but not cure it after it has started; after the leaf has started to curl, it will not cure it. There is a difference between prevention and cure.

Q.—How soon after the leaves are off is it safe to spray?

A.—At least ten days should elapse after the leaves are off. The base of the petiole of the leaf leaves a deep surface scar, and until this heals over it is not advisable to spray. (This refers to fall spraying for scale insects.)

In spraying for codling moth, in spring the important point is to spray just after the petals fall, and then again in ten days' time.

Some of our growers are getting 98 per cent perfect fruit. You may use Paris green and Bordeaux mixture together, although I believe arsenate of lead is more effective and nearly as cheap as Paris green; but a good unadulterated Paris green is excellent.

Q.—What do you use for oyster shell bark louse?

A.—I have seen bad infestations entirely cleaned out by one double spraying of lime-sulphur wash in the fall of the year. This mixture will kill all the scales, and also the cigar case-bearer, eggs of the tent caterpillar, aphids and many other insects.

Q.—What do you mean by spraying?

A.—Two coats; after the first coat is dry, give the trees a retouching spray. This is especially necessary in spraying for San Jose scale. We have growers who are spraying every year because the lime-sulphur wash has such a tonic effect on the trees, although it may not be absolutely necessary in order to keep the scale in check.

Q.—Do you recommend scraping?

A.—I do not think it necessary so far as scale is concerned.

Q.—Does it injure the tree?

A.—It can, if too deep. You should not scrape so deeply as to injure the bark.

Q.—Is salt of any value in the lime-sulphur mixture?

A.—It is not necessary and we do not recommend it. When salt is added to this mixture there is sometimes injury to peach twigs and buds by spraying just after the leaves fall.

We are in the midst of experiments with sulphur-soda wash as a treatment for San Jose scale. Our first experiments killed the

fruit buds, and we have not experimented far enough for me to say just what strength should be used with safety. My opinion is that it should be used about as follows: 4 pounds of caustic soda or concentrated lye, or even washing soda, boiled with three times as much sulphur for an hour, and diluted with 40 or 50 gallons of water.

FARM AND GARDEN Mangals for Milk

If you want to grow roots to feed your cow that won't flavor the milk, grow mangels, and you can grow just as many pounds, and possibly more, than you can turnips, and there will not be any flavour from them unless they become rotten and decayed.—Senator Derbyshire.

Alfalfa Meal as Breakfast Food

A manufacturing process has been discovered by which the wonderful alfalfa may be turned into a product for human consumption and it may now be bought in grocery stores, at least at some grocery stores. As a breakfast food it is said to possess a number of distinct advantages over the ordinary foods sold. It is claimed that it is particularly adapted to weak and delicate stomachs as well as to people in robust health. It seems to have nearly all the merits claimed by any breakfast food. In preparing it, for human use the plant is cut just before it reaches maturity and dried thoroughly. It is then ground to a powder. Afterwards this alfalfa meal is treated by a "secret" process whereby the essential elements become available for the purposes of performing an acceptable and highly nutritious breakfast dish for man.

CIVIC NOTICE

The Municipal Council of the City of Kelowna have determined that it is desirable to construct the sidewalks hereunder mentioned on the following streets, viz:

PLANK SIDEWALKS

Four feet eight inches wide.

(1) On the East side of Richter street from Sutherland Avenue to the Bridge, and on the West side of Richter Street from the Bridge to Cadder Avenue.

(2) On the East side of Abbott Street from Lake Avenue to Park Avenue.

Sixty per cent of the cost of said sidewalks to be assessed against the property immediately fronting thereon, and twenty per cent against the property on the opposite side of the said Streets, and shall be payable in five equal annual payments, and shall be carried out in accordance with the 'Local Improvement By-Law'.

And the Chairman of the Board of Works and the City Assessor having reported to the Council in accordance with the provisions of said By-Law, upon each and every of the said works, giving statements showing the amounts estimated to be chargeable in each case against the various portions of the real property to be benefited by the said sidewalks.

And the report of the Chairman of the Board of Works and the City Assessor having been adopted by the Council.

Notice is hereby given that the said reports are open for inspection at the office of the City Clerk, Bernard Avenue.

City Clerk's Office

August 18th, 1908

G. H. Dunn,

C. M. C.

NOTICE

Tenders will be received by the City Clerk for the construction of the above sidewalks up to August 31st; 1908.

THE ROSS RIFLE TRIUMPHANT

Our local marksmen are eagerly looking forward to the advent of the new issue of Mark II Ross rifles with Mark III sights, promised by the Department of Militia. The back-sight on the Mark II is the weak point of the weapon, and that on the Mark III is said to be as near perfection as it is possible to get. The other changes in model are so slight that the Department is fitting all the available Mark II rifles with Mark III sights and issuing them as fast as possible. The rifle thus equipped is stated to shoot just as well as the Mark III gun, of which very few have as yet been manufactured.

Those unpatriotic partisans who sought to make party capital during the last session of parliament by attacking Canada's national rifle must have peculiar feelings when they read of the latest triumphs of the Ross when pitted against the Lee-Enfield. Staff-Serg. Richardson, of Victoria, won the grand aggregate at the Manitoba Rifle Association's meet two weeks ago, using his Mark III Ross. He put on 100 out of a possible of 105. The Manitoba Free Press says:

"When Richardson left the 600 yards' range he was besieged by innumerable marksmen who were anxious to see the new rifle. He willingly exhibited the arm, and he advised all competitors who hoped to get to Ottawa to provide themselves with the rifle for future shooting. He distinctly stated that it was his firm belief that Canada would not be the only one to use the new weapon, but that Great Britain, seeing a good thing, would be quick to adopt it. So confident was he of the shooting powers of the rifle that he generously accorded the use of one of them to any competitor who was willing to try one. The opportunity was grasped by Sergt. F. A. Clarke, one of Winnipeg's foremost marksmen, who has surrounded himself with many trophies. Using the rifle for the first time at 500 yards Clarke put on four straight bull's-eyes at 6 o'clock, and all of these were within four inches of each other. Every shot was low in the bull, and he put up his elevation one degree, and not noticing that the light had changed as the rain came on, the atmosphere becoming duller, neutralizing the bull's-eye, he obstinately hung on to 12 o'clock and placed four more shots within six inches of each other. Sergt. Clarke had nothing but the highest praise for the new model and declares that the rifle which he will use in the future will be a Ross.

Six of the most prominent riflemen of the M.R.A. competitors have ordered Ross rifles and among them is an old Bisley shot."

To those who would sneer at the Manitoba Rifle Association as only a provincial meet, and therefore one at which a thorough test of the Ross could not be made, may be quoted the following:

"The British newspapers report with surprise the very notable successes at Bisley with the new Canadian Ross rifle and ammunition in the hands of a hitherto unknown marksman, Mr. F. W. Jones, of the National Rifle Association, of London. He carried off first in the "Edge" match for prizes aggregating £50, contributed by Major Edge. This is the stiffest of the long-distance matches, the contestants firing fifteen shots at 1,000 yards, and the same number at

1,100 yards. Mr. Jones scored 73 out of a possible 75 at each range, his total being six points above the best previous record. In the Halford memorial match he won first with fifteen "bulls", or a possible 75 points at 900 yards, and 72 points out of the same possible at 1,000 yards. In the Waldegrave match at 800 yards he won second with 98 points out of a possible 100. Quite the most important victory of the contest was the winning of the Hopton Challenge Cup, which is given for the highest aggregate score in six matches—the Edge, Halford Memorial, Waldegrave, Albert, Bass and Wimbledon. In these Mr. Jones made an aggregate of 726 points out of a possible 750, beating the previous record by 20 points.

"The London newspapers, The Times, The Daily Express, The Daily Mail, The Chronicle, The Standard, The Daily News, all speak in enthusiastic terms of what they call the 'victory for the Ross rifle from Canada', 'which made and unexpected and altogether successful appearance,' and excelled 'all the field of the world's rifles', so that, as The Morning Post says, 'our own Lee-Enfield is apparently 'lagging behind in the great race of modern small arms,' and The Times adds: 'It is a pleasure to refer to a rifle that has been 'much in evidence and which can claim to have been designed, 'manufactured and used as a service weapon within the limits of the Empire.'"

KELOWNA BLOCK WORKS

A Flourishing Industry

A few days ago a representative of the Courier paid a visit to the Kelowna Block Works, of which Mr. W. Haug is proprietor, and he was surprised to find the development of the business since his last previous visit, when concrete blocks for building were the only products turned out. Now, the articles manufactured include pillars, lawn vases, fountains, garden rollers, drain tile, culvert pipes, fence and gate posts, cornices, all classes of ornamental finishings for buildings and even tombstones, the last-named of very neat and artistic design.

The premises have been much enlarged to accommodate the additional machinery required by the extension of the business and the large stock of lime and other masons' supplies which Mr. Haug keeps constantly on hand. The machinery is operated by a gasoline engine which also pumps all the water needed for making blocks and moistening them during the process of seasoning.

Mr. Haug triumphantly points to the buildings that survived the disastrous fire at Fernie as proof of what concrete blocks can stand. The only two buildings in the path of the flames which were not destroyed were the Catholic rectory and the Crow's Nest Coal Co.'s handsome office building, both of which were constructed of hollow concrete blocks. This would seem to refute the charge laid against concrete blocks that they will not stand the intense heat of a general conflagration.

The proprietor of the Kelowna Block Works is of a most optimistic nature and he sees no cloud in the future of his industry. His optimism seems well justified, as the use of concrete in varied forms, especially in that reinforced with steel, is extending year by year, and in Kelowna particularly it will not be long before the whole of the greater part of the business quarter will be of concrete construction.

JOHN COLLINS
JOHN COLLINS & CO.
INSURANCE EMPLOYMENT AGENCY REAL ESTATE LOANS

A Snap

Owner Going to the Old Country

A full bearing orchard with meadow and pasture land for sale, with lake frontage, wharf, boat house etc.; good house, barns, chicken house, stable, etc., plentiful supply of water; price \$8,500, being about \$275 an acre, half cash, remainder in three years. Return from this property at the above price will average FIFTEEN PER CENT. PROFIT per annum. Also other lake shore orchards cheap.

Just fifteen days from date we don't expect to have one buggy or democrat left. We require their space for fruit packing. So out they go. Be on hand. Don't miss it. Not enough to go around. But as long as they last prices won't figure much. Call tomorrow and we will tell you about it.

NOTICE OF APPLICATION FOR LIQUOR LICENCE

Take notice that I, John W. Milligan, intend to apply to the Licence Commissioners for the City of Kelowna for a licence to sell liquor on the premises to be known as the Royal Hotel, situated on part of Lots 4 and 5 in Block 12, Plan 42, in the City of Kelowna.

Dated at Kelowna this 5th day of August, A. D., 1908.

John W. Milligan.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situated. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

COAL.—Coal mining rights may be leased for a period of twenty-one years at the annual rental of \$1.00 per acre. Not more than 2,500 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. COBY,

Deputy of the Minister of the Interior.

Vernon on Monday.

Dr. Gaddes returned from Van-
couver on Monday.

Mr. F. Billings, solicitor, Vernon,
spent a day or two in town this
week.

Mr. and Mrs. F. Conkling and
family returned on Monday from
Vernon.

Mrs. P. B. Willis went to Van-
couver on Saturday for a month's
visit to friends.

Miss N. Shaylor went to Penticton
on Thursday for a week's visit to
Mrs. A. H. Wade.

Mrs. Gubb, who had been paying
a visit to Mrs. McJannet, left on
Saturday for Oils, Alberta.

Mr. R. D. Sinclair, of Summerland,
was a visitor in town last week, re-
turning home on Friday.

Mr. Leonard, of Vancouver, re-
turned home yesterday after sev-
eral days' visit to the valley.

Mrs. J. F. Bawtineimer returned
yesterday from a week's visit to her
sister, Mrs. Mohr, at Vernon.

Mr. Thos. Alcock and Miss Alcock,
of Vancouver, arrived on Wednesday
to pay a visit to Mrs. W. Small.

Mr. W. B. M. Calder left on Tues-
day on a business visit to Toronto,
which will occupy about a month.

Miss Edith Smith returned on
Tuesday from her tour of Califor-
nia and Mexico with the B. C. Sat-
urday Sunset party.

Miss Wade, of Dauphin, Man.,
arrived in town on Saturday, and
assumed her duties on Monday as
a member of the public school staff.

The gang engaged under Mr. J.
Silver in constructing a road up
Bear Creek had a busy time last
week fighting bush fires along the
creek.

The South Okanagan cricket team
went to Revelstoke on Monday to
play a match with the club there,
and on their return journey will
probably play a game at Vernon.

Dr. Boyce returned on Tuesday
from a hurried visit to Norham,
Ont., necessitated by the sad cir-
cumstances of the last illness of his
father, who died soon after his ar-
rival.

Messrs. W. H. Gardner and J. A.
Machray, of Winnipeg, were in town
this week in connection with the
transfer of the holdings of the
Ideal Fruitlands Co. to the Belgian
syndicate.

Miss Buchanan has accepted a
position in Mrs. Titcher's millinery
establishment, and is at present at-
tending the millinery openings at
Seattle and other Coast cities to se-
lect stock.

The statutory monthly meeting of

donated by the Havana Cigar Syn-
dicate, for the best illuminated boat
in the parade on the evening of
Aug. 13th.

School opened on Monday with a
large attendance, including a num-
ber of new scholars. The need of
additional accommodation is most
pressing and can only be remedied
by the erection of another building
as soon as possible.

Mr. Maxwell Smith, Dominion fruit
inspector, spent Tuesday in town
and went south the following day.
He had just come from the Kooten-
ay and Boundary districts, and stated
that these districts had experi-
enced just as dry and hot a sum-
mer as the Okanagan.

A meeting will be held in Raymer's
Hall on Tuesday, Sept. 1st, at 8
p.m., of the amalgamated Choral
and Orchestral societies for the el-
ection of officers and a committee
for the ensuing season. All members
and prospective members are cordi-
ally invited to attend.—Con.

Mr. W. C. Ricardo, of the Cold-
stream Ranch, Vernon, spent Tues-
day in town, and went south yes-
terday. We understand his visit
was in connection with the propos-
ed formation of a Central Farmers'
Exchange, or similar organization,
for the whole Okanagan valley, but
we have not learned any details of
the scheme.

The Epworth League of C. E.
spent a very pleasant evening last
week at Capt. Knight's cottage. Re-
freshments were served and vari-
ous games indulged in, including
baseball, and the entertainment also
took the form of a farewell social for
Miss Annie Knight, who left the
next morning for Vancouver to at-
tend school.—Con.

The handicap launch race, which
was disallowed by the Regatta
Committee, was run again on
Thursday last. Several of the con-

testants in the first race, including
the winner of second place, did not
enter. Mr. F. R. E. Deltart, who
was third in the race on the 13th,
came in first, but was disqualified
for running faster than his test
time. First prize was awarded to
Messrs. C. and G. James, second to
Mr. Seddon and third to Mr. Barne-
by. The competing boats were all
fairly close together at the finish.

A party of C. P. R. officials, in-
cluding Messrs. W. R. Melness, gen-
eral freight agent, Winnipeg, In-
dane and Lanigan, assistant general
freight agents, passed through on
their way south on Tuesday. They
spent about half an hour in town,
and in conversation with local ship-
pers indulged in the usual glittering
generalities as to the benevolent in-
tentions of the Company towards
them and the valley generally. An
earnest of the said benevolent in-
tentions a long-suffering public would
be glad to see a few real new
planks on the wharf, which is not
only an eyesore but also a contin-
ual danger to every team that ven-
tures upon it.

The long spell of heat and drought
which had lasted for practically two
months was broken on Monday by
steady rain, which fell irregularly
during the day and steadily during
the night and Tuesday morning.
A slight thunderstorm passed over
the Mission range on Monday, but
it was neither near enough nor se-
vere enough to scare anyone. The
rain has cleared the air, put out
the bush fires and laid the dust,
and everyone was glad to welcome
it. The dryness of the summer is
well shown by the weather reports,
which give a total of .90 inch rain-
fall for May, .34 for June and .25
for July, or a grand total of bare-
ly 1-2 inches—one good day's rain
ordinarily—for three months. Such
a record means glorious summer
weather, but we COULD stand a
little more moisture without discom-
fort.

KELOWNA REGATTA

Meeting of Subscribers

(Contributed).

A general meeting of the subscri-
bers to the funds of the Regatta
was held on Monday evening, in
Raymer's Hall. The attendance was
small, but the following business
was transacted:

1. The minutes of the previous
meeting on July 2nd were passed
as read.
2. The financial statement—as
submitted—was submitted by the
treasurer and accepted.
3. A hearty vote of thanks was
given to the President, Secretary,
Treasurer and the Committee for
the able manner in which the Re-
gatta was organized and carried
out to the satisfaction of all the
subscribers.
4. It was proposed and accepted
by the whole of the executive that
they hold office till the next gen-
eral meeting, to be held some time
in 1909.

RECEIPTS

BUSINESS LOCAL

Dr. Mathison, dentist, will return to
Kelowna about Sept. 1st, to reside
permanently. 52-1f

Richards & Pringle's Minstrels
will visit Kelowna on Monday, Sept.
7th, as advertised in our columns.
The company includes comedians,
singers and dancers and other ar-
tists who present a most varied
and entertaining programme of va-
deville. They are genuine Ethiop-
ians, and their singing and dancing
are such as only the real darkey
is capable of. Another strong point
is that they are accompanied by a
fine band and orchestra, and all-
in-all the performance promises to
be one that everybody should make
a point of seeing.

Want a Runny?

McLaughlin buggies are
famed for their elegance of
style and wonderful durability.

For forty years the Mc-
Laughlin Carriage Co. have
produced rigs which have es-
tablished their motto of "One
Grade Only, and that The
Best."

Why McLaughlin Rigs Are Noiseless

They have Rubber and Brass Washers. Steel against steel
makes a noisy, unserviceable bearing; steel against leather
makes a hard running and short lived bearing; steel against
brass makes the smoothest running and longest lived bearing
known to modern mechanics. That's what the McLaughlin have.

THE PEOPLES STORE

Notice to the Public!

The floor space of our store is to be increased to twice the present size.

Our new goods are already in and will be displayed on our shelves very shortly.

In the meantime we still have many bargains to offer and would advise all who wish to make great savings on summer goods to call at once and secure their share before all the good things are gone.

Watch this space next week for something extra special.
